

Postdoctoral Training Program

UT Southwestern provides postdoctoral trainees with the skills, opportunities, and encouragement to become true problem-solvers in the biological, physical, computational, and behavioral sciences. Along with instruction in scientific knowledge, you will receive training for a successful, independent career as a scientific professional, with opportunities for honing skills in research, communication, leadership, and management.

You have a lot to consider. We have a lot to offer.

- World-renowned faculty
- Groundbreaking biomedical research
- Outstanding and diverse postdoc community
- Collaborative, cross-disciplinary environment with access to abundant cutting-edge technology
- Innovative enhancements to postdoctoral training
- Dedicated, full-time career and professional development staff
- Competitive salary, medical and retirement benefits
- Great, cosmopolitan city to call home

Strong Foundation in Science and Professionalism

Our award-winning faculty lead scientific professional societies and sit on boards of biomedical companies and editorial boards of scientific journals. You will train in our state-of-the-art laboratories while participating in our postdoctoral certificate program, which includes both research and professional development courses. As a member of the Blackstone LaunchPad & TechStars network, UT Southwestern trainees have access to entrepreneurial learning and opportunities.

Dallas Life

At UT Southwestern, you will enjoy a thriving blend of culture, commerce, and activities in the Dallas-Fort Worth area. The city is affordable, with a cost of living lower than many other areas of comparable size and features. Dallas is home to multiple universities, nonprofit societies, and a growing influx of life science startups, providing opportunities for postdocs to fulfill career goals.
