

Postdoctoral Fellowship
UT Southwestern Department of Psychiatry
Center for Depression Research and Clinical Care

Under the supervision and mentorship of the Center Director ([Madhukar H. Trivedi, M.D.](#)) and Clinical Psychologist ([Lynnel C. Goodman, Ph.D.](#)), the postdoctoral researcher will advance her/his/their training in research focusing on the evaluation of mental health promotion programs and services for depression, as well as strategies for effective dissemination and implementation of evidence-based treatments and services. Our programs are offered through a variety of partnerships with the community and school systems, as well as through various networks as part of the Texas Child Mental Health Care Consortium.

The postdoctoral researcher may:

- a. participate in the development and delivery of behavioral activation programs and interventions addressing youth and adult depression and associated disorders;
- b. perform research related clinical interviews and assessments;
- c. participate in the delivery of mental health and resilience promotion programs in schools, colleges, and universities;
- d. develop, design and conduct research efforts in line with this research plan;
- e. formulate research methods and suggest improvements for quality and serve as part of a team;
- f. coordinate database management, conduct data analysis, and interpret results;
- g. develop and provide training and consultation on assessment, psychosocial intervention, and safety planning to research coordinators and/or graduate student trainees;
- h. co-author or author publications and presentations.

This position is a full-time, one-year funded position, with the option for a second year. Salary and benefits commensurate with NIH rates based on experience and qualifications. Information on our postdoctoral training program, benefits, and a virtual tour can be found at <http://www.utsouthwestern.edu/postdocs>.

Required Qualifications:

1. A Ph.D. in clinical psychology, or related field
2. At least one year of experience with project-related research methodology
3. Excellent writing and analytic skills as evidenced by application materials, peer-reviewed publications, dissertation, or writing sample
4. Experience conducting empirically supported treatments and structured clinical interviews
5. Strong verbal communication skills as evidenced by work and/or education experience and interview process

Please submit a letter of interest, curriculum vitae, writing sample, and contact information for three professional references to:
